Load Your
coin canister
in 1/3 the time!

Recognizing that time is money, the Canister Loading Solution™ is a fast, easy, and dependable method for loading coin into the canister of your coin dispenser. The mechanism dramatically reduces the time required to load each canister. The Canister Loading Solution™ is designed to work on the T-Fle™.

Made of precision-molded, polycarbonate construction, simply adjust the molded funnel device over the desired coin column and drop in the coins. The Canister Loading Device™ can be loaded from bagged coin or loose coin separated by denomination.
