T-Flex™ Coin Dispenser Now Certified for Integration with Gilbarco® Passport® Point of Sale Software

*T-Flex Coin Dispenser Available for use in
Convenience Stores Nationwide*

Salem, NH – Telequip® is pleased to announce the certification of the T-Flex Coin Dispenser for use with the Gilbarco Passport software, version 6.01 and above. The Gilbarco Passport software is being deployed across a variety of gas station and convenience store chains nationwide.

Telequip and Gilbarco collaborated on the integration of the T-Flex Coin Dispenser interface allowing Gilbarco Passport Point of Sale software to recognize and track coins being dispensed by the Coin Dispenser. Achieving Certified Partner status from Gilbarco Veeder-Root was the result of several months of co-development and testing efforts between the two companies.

The combination of the T-Flex Coin Dispenser and the Gilbarco Passport software will ensure accurate execution of all cash transactions on the point of sale system. This solution will improve the speed of service by five to seven seconds on all cash transactions. Cash transactions are more prevalent at convenience stores today due to the high fees involved with the use of credit cards.

“Expediting the point-of-sale transaction during busy peak hours is a priority in the highly competitive convenience store market today. Getting people in and out quickly is crucial. I believe our customers will be pleased to have a new tool available to them to improve the speed and accuracy of all cash transactions,” said Mikey Kindler, director of POS marketing for Gilbarco Veeder-Root.

The T-Flex streamlines the cash management process, allowing faster shift changeovers and less coin replenishment throughout the day. Cashier errors are eliminated, as the T-Flex Coin Dispenser automatically calculates the correct change through the existing Point of Sale system. This feature aids in safeguarding against shrink as well, and transactions become more dependable and accurate.

“We are very pleased to have achieved Certified Partner status with Gilbarco Veeder-Root. This accomplishment will allow us to offer our product to a new segment of the convenience store market that was unavailable to us before now”, said Alice Moran, Marketing Manager at Telequip, a division of Crane Payment Solutions.
